### Office Action Summary

**Application No.**

10/594,601

**Applicant(s)**

MATSUI ET AL.

**Examiner**

William E. Tapolcai

**Art Unit**

3744

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 09 December 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. Claims 4, 6, 9-16, and 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 3, 2008.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,453,693 to Ewert et al in view of U.S. Patent No. 7,213,664 to Nomura et al and U.S. Patent Application Publication No. 2005/0074665 to Spaziante et al. Ewert et al discloses the claimed combination of a refrigeration system powered by an alternative power source 205 such as a fuel cell. However, Ewert et al does not disclose that the power generated by the fuel cell over that required to run the refrigeration system is supplied to a commercial power system. Nomura et al teaches an electrical system which is powered by a fuel cell. Nomura et al further teaches that the excess electrical power generated by the fuel cell is stored in a storage battery. Also, Spaziante et al teaches an electrical system that powered by photovoltaic cells. Paragraph 0100 of Spaziante et al teaches that the excess power produced by the photovoltaic cells is outputted to a distribution grid or commercial power system. Photovoltaic cells are considered to be analogous to fuel cells in that they both supply electricity apart from a commercial system. Thus, it would be obvious to provide Ewert

et al with a system that supplies excess power generated by the fuel cell 205 to a commercial power grid or system, in view of the combined teachings of Nomura et al and Spaziante et al, to yield the predictable result of conserving on electrical power generated by the commercial power system.

4. Claims 3, 5, 7, 17, 19, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments filed December 9, 2008 have been fully considered but they are not persuasive. Applicant has attacked each of the references singularly without addressing the references as combined. In addition, Applicant has failed to address a key component of the rejection, that is, that the photovoltaic cells of Spaziante et al are analogous to the fuel cells of Ewert or the claimed fuel cells.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
